

CALL FOR PAPERS

ICMDMEA 2022
Dec 13-14, 2022
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMDMEA 2022 : International Conference on Marine Data Management and Engineering Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Marine Data Management and Engineering Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Marine data management

Data management for marine geology
and geophysics

Maritime data integration and
analysis

Ocean and coastal data management

Semantic representation of marine
monitoring data

Oceanographic and marine

cross-domain data management

Oceanographic data management

Oceanographic data and information
exchange

Ocean data view

Metadata for marine data managers

Modeling and analysis in marine big
data

Marine big data management
architecture

Methods and models in marine big
data management

Application in marine big data

Challenges in marine big data
management
