

# CALL FOR PAPERS

**ICGRGM 2022**  
**Dec 27-28, 2022**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGRGM 2022 : International Conference on Geophysical Research and Geophysical Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geophysical Research and Geophysical Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geophysical methods for  
environmental studies  
Subsoil for environmental  
investigations  
Hydrological and hydrogeological  
characterization and monitoring  
Geotechnical applications of  
geophysical methods  
Measurement of gravity on land and  
moving platforms  
Pre-processing, displaying and  
enhancing gravity data  
Interpretation, modelling and  
examples

Applications of gravity surveying  
and examples  
Slope stability assessments  
Archaeological surveys  
Voids and karstic features  
Soil characterization  
Contamination assessment
