

CALL FOR PAPERS

ICMDT 2022
Dec 27-28, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMDT 2022 : International Conference on Multiuser Detection Techniques is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Multiuser Detection Techniques. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Multiuser detection
Optimum multiuser detection
Linear multiuser detection
Non-linear multiuser detection
Interference cancellation

Multiuser detection techniques
Adaptive multiuser detection
Multiuser detection in wireless networks
Blind multiuser detection in fading channels
