

CALL FOR PAPERS

ICMIGE 2022
Dec 27-28, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMIGE 2022 : International Conference on Monitoring and Instrumentation in Geotechnical Engineering is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Monitoring and Instrumentation in Geotechnical Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Instrumentation and monitoring in
geotechnical engineering
Monitoring systems and
characterization techniques for
civil infrastructure health
monitoring
Nonparametric monitoring for
geotechnical structures

Field assessment and specification
review for civil infrastructures
Experimental and numerical study of
earth pressure
Stability evaluation of civil
infrastructures
