

CALL FOR PAPERS

ICRAESM 2022
Dec 27-28, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRAESM 2022 : International Conference on Recent Advances in Energy Storage Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Advances in Energy Storage Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energy storage materials	Power storage devices
Next-generation energy storage materials	Fuel cell materials
Organic and hybrid photovoltaics	Solar cell materials
Solar cell materials and devices	Materials for the hydrogen economy
Thermoelectrics and thermal transport	Heat storage materials
Energy harvesting	Pumped-storage power
Electrochemical energy storage and conversion	Compressed air energy storage
Na and other ion batteries	Capacitive energy storage
Li-S batteries	Superconducting energy storage
Supercapacitors and hybrid capacitors	Inductance energy storage
Li-air batteries, flow batteries and fuel cells	Lead acid battery
Solar, hydrogen, thermal energy conversion and storage	Lithium ion battery
Battery management system	Sodium-sulfur battery
