

CALL FOR PAPERS

ICEEED 2023
Feb 08-09, 2023
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEEED 2023 : International Conference on Embedded Electronics Engineering and Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Embedded Electronics Engineering and Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Embedded electronics systems
Embedded electronic system design
and development
Embedded software and firmware
technologies
Processors and micro-controllers
Embedded operational systems
Drivers for hardware interfaces
Control systems and automatic code
generation
Embedded processor technology for
specific applications
Soft-core processors and
micro-controllers

Highly-complex multilayer printed
circuit board technologies
Stack-up modeling and simulation
Impedance control
Layout techniques
Flexible substrates
Design for assembly and design for
test
Signal integrity
Power integrity
High-speed digital design
