

CALL FOR PAPERS

ICAWE 2023
Mar 25-26, 2023
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAWE 2023 : International Conference on Advanced Weapons Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Weapons Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Weapons engineering
Advances in weapons engineering
Weapons engineering and case studies
Emerging weapons technologies
Military weapons and systems
Military inventions
History of military technology
Modern military technology
Fundamentals of ballistics
Weapon system technology
Electric drive technologies
Light weapon design
Military autonomous vehicles

Survivability
Armored fighting vehicle and weapon systems study
Vehicle systems integration
Reliability and system effectiveness
Design study/projects
Fighting vehicle design
Finite element methods in engineering
Systems engineering and assured performance
Modelling, simulation and control
Military vehicle dynamics
Military vehicles propulsion and dynamics
Gun system design
