

CALL FOR PAPERS

ICFMR 2023
Mar 22-23, 2023
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFMR 2023 : International Conference on Ferrous Metal Recycling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ferrous Metal Recycling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Materials science and engineering
Metal recycling
Benefits of recycling
Metal recycling industry
Global metals recycling
Ferrous metal recycling
Recycling hazardous and non-hazardous metals
Metal waste management
Metal recovery
Recyclable materials
Processing
Resources
Hazards

Economic role
Scrap and scrapyards
Savings in energy
Savings in raw materials used
Ferrous metals
Precious metals
Non ferrous metals
Superabrasives
Metallurgy
Metallic elements and their intermetallic compounds
Technology of metals
Metalworking processes
Metal forming
