

CALL FOR PAPERS

ICSCTC 2023
Mar 08-09, 2023
Bangkok, Thailand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCTC 2023 : International Conference on Steel Construction, Tension and Compression is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Steel Construction, Tension and Compression. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Steel construction
Steel building
Structural steel buildings
Advantages
Disadvantages
Types
Components
Structural steel
Steel erection
Field connections
Safety
Problems
Member and connection resistance

Materials, standards and identification
Loads and safety criterion
Analysis of structure
Stability of structures and members
Design requirements
Stability analysis and design
Design of members for tension
Design of members for compression
Design of members for flexure
Design of members for shear
Design of members for combined forces and torsion
Design of composite members
Design of connections
