

# CALL FOR PAPERS

**ICCISDMA 2023**  
**Mar 22-23, 2023**  
**Dubai, UAE**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCISDMA 2023 : International Conference on Civil Infrastructure Systems, Design, Modeling and Analysis is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Civil Infrastructure Systems, Design, Modeling and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil infrastructure systems  
Civil infrastructure systems and engineering  
Risk analysis and optimal design  
urban transportation systems  
Structural dynamics design  
Resilience engineering and sensors  
Advanced structural dynamics design  
sensing and information modeling for infrastructure systems  
advanced analytics and visualization for infrastructure systems

Construction, operation and maintenance phases of infrastructure systems  
Design and project management for civil infrastructure systems  
New models, methods and tools for planning and infrastructure management  
Sustainable processes and components in built infrastructure  
Construction management, facilities operation and management  
Energy efficiency of buildings  
Structural health monitoring  
Risk assessment and decision-making
