

CALL FOR PAPERS

ICESET 2023
Mar 15-16, 2023
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICESET 2023 : International Conference on Energy System Engineering and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energy System Engineering and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energy system engineering
Solar energy systems
Wind energy systems
Hydrogen energy systems
Biomass energy systems
Geothermal energy systems
Bio mass energy
Hydrolique energy
Geothermal energy
Combustion and energy production systems
Clean coal technologies
Combustion

Emissions' control
Fossil fuels and applications
Fuels and alternatives
Gas turbine technologies
Gas-fired power plants
Nuclear power
On-site power
Power devices and driving circuits in energy systems
Utility-scale renewable power
Energy and exergy
Energy conservation and analysis
Energy conversion
