

CALL FOR PAPERS

ICABC 2023
Mar 25-26, 2023
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICABC 2023 : International Conference on Approximate Bayesian Computation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Approximate Bayesian Computation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Approximate Bayesian Computation
Regression Approaches
Summary Statistics
Likelihood-free Model Choice
Approximate Bayesian Computation
and Indirect Inference
High-Dimensional Approximate
Bayesian Computation

Theoretical and Methodological
Aspects of Markov Chain Monte Carlo
Computations
Approximate Bayesian Computation in
Science, Technology and
Engineering
Application of ABC to Infer about
the Genetic History of Pygmy
Hunter-Gatherers
Approximate Bayesian Computation in
Ecological Modelling
Approximate Bayesian Computation in
Nuclear Imaging
