

CALL FOR PAPERS

ICEGGIS 2023
Mar 25-26, 2023
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEGGIS 2023 : International Conference on Environmental Geomatics and Geographical Information Systems is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Environmental Geomatics and Geographical Information Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Fundamentals of environmental
geomatics
Applications of geomatics
Projections and coordinate systems
Maps and cartography
Assessment, monitoring and
management of global resources
Environmental management
Environmental applications of GIS
and EO
Appreciation of GIS and EO in
environmental management
Management of biological reserves
Environmental remote sensing
Geomatics for the built
environment

Environmental systems analysis
Data models and the geodatabase
Analysis techniques
Data management and documentation
Conceptualization and
representation of spatial
information
Standard geoprocessing and
analytical methods
Different remote sensing platforms,
instruments and data types
Geographical information systems
Earth observation
Global positioning systems
