

# CALL FOR PAPERS

**ICBEA 2023**  
**Mar 11-12, 2023**  
**Miami, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBEA 2023 : International Conference on Biodiesel Engineering and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biodiesel Engineering and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biodiesel engineering	Lipase-catalyzed method
Biodiesel technologies and their applications	Biodiesel feedstock
Biodiesel as alternative fuel	Advanced and cellulosic ethanol
Renewable energy resource	Feedstock development
Recycling and reduced waste	Emission of gases
Reduced emissions	Biological conversion approaches
Improved quality control	Best practices in biomass supply chains
Effective burning	The role of pilot-scale production
Biodiesel productions	Advanced biofuels
Biodiesel vegetable and animal fats	Second generation biofuels
From Jatropha curcas	Third generation biofuels
Ultrasonic reactor method
