

CALL FOR PAPERS

ICE 2023
Mar 11-12, 2023
Miami, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICE 2023 : International Conference on Ecogeomorphology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ecogeomorphology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ecogeomorphology
Ecogeomorphology and river management
Consequences of climate change on ecogeomorphologic systems
River systems and ecogeomorphologic processes
Ecohydraulics and ecogeomorphology

Ecogeomorphology of fluviodeltaic systems
Ecogeomorphic feedbacks and river morphodynamics
Biogeomorphological organisms
The relation between organisms and geomorphological processes
Terrestrial and freshwater systems
