

CALL FOR PAPERS

ICWSR 2023
Mar 29-30, 2023
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWSR 2023 : International Conference on Weathering and Sedimentary Rocks is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Weathering and Sedimentary Rocks. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Weathering
Weathering, erosion and landforms
Environmental factors affecting
rates of weathering
Mechanisms of weathering
Physical weathering
Thermal stress
Frost weathering
Ocean waves
Pressure release
Salt-crystal growth
Biological effects on mechanical
weathering
Chemical weathering

Dissolution and carbonation
Hydration
Hydrolysis of silicates and
carbonates
Oxidation
Biological weathering
Building weathering
Properties of well-weathered soils
Global chemical weathering of
surficial rocks
Weathering and soil formation
Erosion, transportation and
deposition
Weathered volcanic rocks
Weathering and sedimentary rocks
