

CALL FOR PAPERS

ICGEIGM 2023
Mar 22-23, 2023
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGEIGM 2023 : International Conference on Geotechnical Engineering Investigation and Geophysical Methods is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geotechnical Engineering Investigation and Geophysical Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnical engineering
investigation
Analysis requirements for
structures
Geotechnical investigation and
testing
Geotechnical site investigation
methods
Test pitting, drilling, soil
sampling and rock coring
In situ testing, cone penetration
testing of soil profiles
Geophysical testing
Standard penetration test
Cone penetration test
Geotechnical investigation and
testing program
Laboratory testing methods for
soils and rocks

Applications and limitations
Geotechnical parameter assessment
Location and depth of borings
Boring and sampling
Field record
Laboratory testing
Geotechnical report
Geologic mapping
Geophysical methods
Photogrammetry
