

CALL FOR PAPERS

ICAGM 2023
Mar 25-26, 2023
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAGM 2023 : International Conference on Advances in Geotechnical Modeling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Geotechnical Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnical modeling
Soil behavior and laboratory
element testing
Stress and strain variables
Constitutive modeling
Elastic models
Numerical modeling
Field problems and FEM
Physical modeling

Dimensional analysis
Centrifuge modeling
Mechanics of centrifuge modeling
Model preparation
Geotechnical processes
Pore fluid and instrumentation
Theoretical modeling
