

# CALL FOR PAPERS

**ICCCMSA 2023**  
**Mar 25-26, 2023**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCMSA 2023 : International Conference on Chaos, Control, Modelling, Simulation and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chaos, Control, Modelling, Simulation and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Adaptive control	Circuit realization of chaotic systems
Advanced chaos theory	Control of chaotic systems
Advanced computing techniques	Cloud computing
Algorithms, modelling and simulation	Communication engineering
Applications of chaos in science and engineering	Computational biology
Artificial intelligence	Computational fluid dynamics
Artificial neural networks	Computer science
Automation and mobile robots	Control devices and instruments
Bioinformatics	Control theory
Biological modelling	Data mining
Biological systems and models	Data Structures and Algorithms
Chaotic systems	Scientific computing
Chaos modelling	Secure communication devices
