

CALL FOR PAPERS

ICEAPT 2023
Apr 08-09, 2023
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEAPT 2023 : International Conference on Electric Aircraft and Propulsion Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electric Aircraft and Propulsion Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electric aircraft technology
Distributed electric propulsion
Electric aircraft research
Next generation more-electric aircraft
Electric and hybrid aerospace technology
Hybrid-electric propulsion

Power systems and distribution networks for electric aircrafts
Technology for integrated power management and thermal management
Air management technology
Power electronics, machines and control for electric aircraft systems
Leading-edge technology for next generation aircraft
