

CALL FOR PAPERS

ICMFFS 2023
Apr 08-09, 2023
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMFFS 2023 : International Conference on Modified Foods and Food Security is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Modified Foods and Food Security. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advanced biotechnological and nanoscience developments and applications in food research
New paths for food process innovation
Bioactive compounds ingredients and technologies
Food processing
Consumer attitudes to food and risk assessment.
Food allergies and intolerances
Food chemistry and biochemistry
Food function and relationships between diet and disease
Food microbiology

New developments in food engineering
Postharvest storage and food handling
Rapid techniques for online control
Food processing and packaging
Novel processing and packaging technologies
Quality assurance methods
Risk assessment of both biological and non-biological hazards in food
Innovative products, ingredients and packaging
