

# CALL FOR PAPERS

**ICECES 2023**  
**Apr 05-06, 2023**  
**Cancun, Mexico**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICECES 2023 : International Conference on Ecological Cybernetics and Ecological Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ecological Cybernetics and Ecological Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ecological cybernetics	Ecological engineering and development
Ecological cybernetics for sustainable development and growth	Restoration ecology
Cybernetics of environmental decision-making	Ecology conservation and ecosystem rehabilitation
Control processes in ecological systems	Non-renewable resource conservation
Ecological modelling, prediction and management	Air quality and atmospheric pollution
Environmental management systems	Ecosystems and ecology
Systems ecology	Ecosystems management
Ecological systems and complexity theory	Environmental economics - sustainable services and systems
Sustainable ecological systems and environment	Environmental health and impact assessment
Systems analysis and simulation in ecology	Change of environmental systems
Ecological system analysis and design	Health aspects of waste water and solid waste management
Models in ecosystem science	Life cycle management and sustainable production
Second order cybernetics and semiotics in ecological systems
