

# CALL FOR PAPERS

**ICANET 2023**  
**Apr 29-30, 2023**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICANET 2023 : International Conference on Advanced Nanomaterials for Energy Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Nanomaterials for Energy Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nanomaterials and renewable sources  
for energy technologies  
Nanomaterials for bio-mass  
conversion  
Nanomaterials for energy production  
and storage  
Energy conversion  
Bio-energy production

Materials for energy storage:  
supercapacitors, batteries, fuel  
cells  
Water splitting  
Energy production technologies  
Energy production by catalysis:  
photocatalysis, electrocatalysis
