

# CALL FOR PAPERS

**ICBSB 2023**  
**Apr 29-30, 2023**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBSB 2023 : International Conference on Biocybernetics and Systems Biology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biocybernetics and Systems Biology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biocybernetics  
Biocybernetics and biomedical engineering  
Cybernetics and biological sciences  
Systems biology, neurology and multicellular systems  
Biocybernetics and theoretical biology  
Molecular cybernetics, neurocybernetics and cellular cybernetics  
Evolutionary cybernetics  
Computational biology  
Computational biomodeling

Biomedical cybernetics softwares  
Multidimensional biophysics  
Harmful and healing biocybernetic transformations  
Biolaser, biocybernetic transformations and biocybernetic shields  
Biodiagnostics and healing of biosystems  
Synthetic biology  
Superorganism  
Neurobionics
