

# CALL FOR PAPERS

**ICECST 2023**  
**Apr 22-23, 2023**  
**New York, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICECST 2023 : International Conference on Embedded Communications, Systems and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Embedded Communications, Systems and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Embedded communication systems  
Embedded communication  
Embedded systems  
Architecture issues and codesign  
methodologies  
Communication protocols design  
methodology  
Functional description and  
implementation  
Modeling of embedded communication  
systems  
Protocol processing and  
transmission algorithms  
Real-time operating systems

High level description languages  
and validation procedures  
Synchronization and inter-modules  
communications  
Performance analysis and  
optimization  
Integrated communication devices  
and systems  
Distributed dependability  
Real-time systems  
Fault tolerant computing  
Error coding  
Formal methods
