

CALL FOR PAPERS

ICBSB 2023
Apr 08-09, 2023
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBSB 2023 : International Conference on Biocybernetics and Systems Biology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biocybernetics and Systems Biology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biocybernetics
Biocybernetics and biomedical engineering
Cybernetics and biological sciences
Systems biology, neurology and multicellular systems
Biocybernetics and theoretical biology
Molecular cybernetics, neurocybernetics and cellular cybernetics
Evolutionary cybernetics
Computational biology
Computational biomodeling

Biomedical cybernetics softwares
Multidimensional biophysics
Harmful and healing biocybernetic transformations
Biolaser, biocybernetic transformations and biocybernetic shields
Biodiagnostics and healing of biosystems
Synthetic biology
Superorganism
Neurobionics
