

# CALL FOR PAPERS

**ICRPTM 2023**  
**Apr 08-09, 2023**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRPTM 2023 : International Conference on Rapid Prototyping, Tooling and Manufacturing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Rapid Prototyping, Tooling and Manufacturing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Rapid prototyping	Selective laser sintering
Computer-aided design and manufacturing	Agile software development
Rapid prototyping and production automotive spareparts	Cloud computing
Software development	Supply chain management
3D printing	New product development
Ballistic particle manufacturing	Design for agile manufacture
Directed light fabrication	Agility in remote production
Direct-shell production casting	Quality assurance and six sigma
Fused deposition modeling	Empirical methods for assessing lean and agile processes
Laminated object manufacturing	Cross-disciplinary aspects of agility
Shape deposition manufacturing	Agile software development
Solid ground curing	Agile supply chain development
Stereolithography	Micro/nano manufacturing
