

CALL FOR PAPERS

ICEFBS 2023
May 20-21, 2023
Berlin, Germany

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEFBS 2023 : International Conference on Eco-Friendly Building Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Eco-Friendly Building Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Eco-friendly building
Environmentally conscious
construction methods
Environment-conscious construction
materials and systems
Design and design processes for
sustainable structure
Construction practices associated
with protection of environment
Application of industry standards
for buildings
Environmental and energy
performance of buildings
Impacts on selection of methods,
materials and equipment for
construction
Management systems for support
environmentally conscious building
Eco friendly construction methods
and materials
Eco-friendly building techniques
Green construction, green structure
and green building
Green structure design

Green structure and planning
Planning, design and
implementation
Green infrastructure
Green structure strategy
Essential elements
Green architecture
Benefits of green roofs and green
walls
Reducing environmental impact
Goals of green building
Life cycle assessment
Siting and structure design
efficiency
Energy efficiency
Water efficiency
