

# CALL FOR PAPERS

**ICBMSM 2023**  
**Jun 07-08, 2023**  
**San Francisco, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBMSM 2023 : International Conference on Behavior and Mechanics of Superconducting Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Behavior and Mechanics of Superconducting Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Superconducting materials  
Novel superconducting materials and applications  
Superconductivity, superconductors and superconducting materials  
Engineering applications and processing challenges  
Novel applications and manufacturing techniques  
Chemistry of superconducting materials  
Superconductor principles  
High-temperature superconductors  
Mechanical properties of superconducting materials

Iron-based superconductors  
Organic superconductors  
Carbon-based materials  
Chemical doping effects on superconductivity  
New materials  
Physical and chemical properties of new superconducting materials  
Material synthesis  
Heterostructures  
Thin films
