

CALL FOR PAPERS

ICACSS 2023
Jun 21-22, 2023
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACSS 2023 : International Conference on Asynchronous Communication and Synchronous Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Asynchronous Communication and Synchronous Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Asynchronous communication	Time and the process channel model
Physical layer	Synchronous systems
Data link layer and higher	Monitoring models
Application layer	Processes and events
Information theory	Local and global states
Information source	Process coordination
Information measure	Time, time intervals and global time
Information management	Cause-effect relationship, concurrent events
Information technology	Logical clocks
Electronically mediated communication	Message delivery to processes
Asynchronous message passing system models	Process algebra
Process models	Final remarks on process models
