

# CALL FOR PAPERS

**ICEES 2023**  
**Jun 21-22, 2023**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEES 2023 : International Conference on Earthquake Engineering and Safety is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Earthquake Engineering and Safety. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Earthquake engineering  
Principles of performance-based  
earthquake engineering  
Seismic hazard and seismic risk  
analysis  
Geotechnical earthquake  
engineering  
Pushover-based methods  
Nonlinear response history methods  
Passive energy systems  
Seismic isolation  
Nonbuilding structures  
Seismic response analysis

Seismic behavior  
Application and implementation of  
ecological design  
Seismic fragility analysis  
Dynamic stress concentration  
Seismic reliability analysis  
Seismic damage analyses  
Seismic effect  
Mechanical behavior  
Seismic performance  
Seismic risk assessment
