

# CALL FOR PAPERS

**ICMOS 2023**  
**Jun 21-22, 2023**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMOS 2023 : International Conference on Monitoring of Offshore Structures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Monitoring of Offshore Structures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Monitoring of coastal and offshore structures  
Health monitoring in the presence of degradation processes and fatigue  
Sensor performance in marine environments  
Development and application of non-destructive techniques  
Data treatment  
Statistical methods  
Probabilistic methods

Measurement of loading  
Value of information from structural health monitoring  
Identification of material properties  
Offshore oil and gas platforms, wind or ocean energy structures, wharves, dikes, seawalls  
Monitoring of soil, dams and embankment  
Performance of maintenance and repair
