

CALL FOR PAPERS

ICSPET 2023
Jun 21-22, 2023
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSPET 2023 : International Conference on Software Product Engineering and Testing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Product Engineering and Testing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Software product engineering
Applications of software product engineering
Advances in software product engineering
Recent topics in software product engineering
Usability engineering
Software configuration management
Management of software configuration management process
Organizational context for software configuration management
Constraints and guidance for software configuration management process
Planning for software configuration management
Software configuration management plan

Surveillance of software configuration management
Software configuration identification
Identifying items
Project's defined software process
Integrated software management
Developing software requirements and software architecture
Programming and integrating software components
Software requirements document
Software design document
Test plan and test procedures
Software work products, plans, commitments, and processes
