

# CALL FOR PAPERS

**ICWRTAMT 2023**  
**Jul 26-27, 2023**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWRTAMT 2023 : International Conference on Wildlife Radio Telemetry and Animal Monitoring Technologies is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wildlife Radio Telemetry and Animal Monitoring Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wildlife radio telemetry

Animal monitoring technology

Equipment, field techniques and data analysis

Analysis of wildlife radio-tracking data

Models of age-specific survival and breeding

Demographic estimates from radio-tagging

Wildlife radio telemetry

Fish and wildlife tracking solutions

Effects of radio-tagging on breeding behavior

Methods of radio-tagging

Techniques for radio-tagging

Online localization of radio-tagged wildlife

Tracking animal location and activity

Marine mammal tagging

Wildlife control technology

GIS for wildlife management

GIS for wildlife conservation

Satellite imagery
