

CALL FOR PAPERS

ICVSLIA 2023
Jul 19-20, 2023
Copenhagen, Denmark

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICVSLIA 2023 : International Conference on Visual Statistical Learning in Infancy and Adulthood is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Visual Statistical Learning in Infancy and Adulthood. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Visual statistical learning
Experimental design in visual statistical learning
Visual statistical learning in children and young adults
The automaticity of visual statistical learning

Multidimensional visual statistical learning
Visual statistical learning in infancy
Higher order structure in visual statistical learning
Role of attention and perceptual grouping in visual statistical learning
