

# CALL FOR PAPERS

**ICGCRSA 2023**  
**Jul 26-27, 2023**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGCRSA 2023 : International Conference on Gas-Cooled Reactor and Safety Aspects is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Gas-Cooled Reactor and Safety Aspects. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Gas-cooled reactor
- Nuclear reactor
- Gas-cooled reactor technology
- Types of gas-cooled reactor
- Heavy water gas cooled reactor
- Advanced gas-cooled reactor
- Gas-cooled fast reactor
- Gas turbine modular helium reactor
- High temperature gas cooled reactor
- Pebble bed reactor
- Very high temperature reactor

- Gas-cooled reactors and their applications
- Technical evolution and operation
- Development
- The nuclear electricity and heat generation
- Safety aspects
- Regulatory aspects
- User's perspectives on gas-cooled reactors
- Future applications
- Financing models
- Market prospects
