

CALL FOR PAPERS

ICACE 2023
Aug 23-24, 2023
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACE 2023 : International Conference on Advances in Control Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Control Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Control engineering and technology
Advanced control engineering and technology
Advanced motion control
Applications in systems and engineering
Automation and artificial intelligence
Automation, control and robotics
Automotive and transportation systems
CFD and thermal science engineering
Computer application technology
Computer integrated manufacturing
Computer system structure
Control engineering
Control system modeling and simulation technology

Electronic automation
Embedded systems
Fault detection and diagnosis in mechatronics systems
Fluid power transmission and control
Human-machine interface
Industrial robotics and automation
Intelligent control
Intelligent optimization algorithms and applications
Intelligent traffic control
Machine vision
Manufacturing engineering
Mechatronics in energy systems
Micro mechatronics
