

CALL FOR PAPERS

ICVMGS 2023
Aug 23-24, 2023
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICVMGS 2023 : International Conference on Volcano Monitoring and Geophysical Signals is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Volcano Monitoring and Geophysical Signals. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Volcano monitoring
Eruption precursors
Forecasting
Risk communication

Volcano monitoring and risk
reduction
Volcano hazards and preventing
volcanic disasters
Geophysical and geochemical signals
New methods and future trends in
seismological volcano monitoring
