

CALL FOR PAPERS

ICDAS 2023
Aug 30-31, 2023
Moscow, Russia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDAS 2023 : International Conference on Dynamics of Aerospace Structures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Dynamics of Aerospace Structures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Dynamics of aerospace structures
Dynamics of mechanical and aerospace structures
Dynamics of discrete systems
Dynamics of continuous systems
Computational methods for vibration and transient analysis
Dynamics principles
Structural vibrations
Transient structural responses
Vibration measurements
Applications of vibration principles

Theoretical aspects and modern computational methods for modeling
Analysis and design of dynamical systems
Finite elements
Material mechanics
Data processing
Experimental work and electronic laboratory
Pneumatic structures and adaptive lightweight construction
High altitude platforms
Integrated systems for motion measurement and navigation
