

CALL FOR PAPERS

ICET 2023
Aug 16-17, 2023
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICET 2023 : International Conference on Economics of Transportation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Economics of Transportation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Transportation economics
Transport pricing and investment
Competition policy
Transport decisions under uncertainty
Agglomeration effects
Valuation of intangibles and privatization
The economics of new transport technologies
The political economy of transport decisions

Transit oriented development
Integrated land use and transport models
Transportation greenhouse gas emissions, energy efficiency and land development
Walking, bicycling, shared transport and the built environment
Smart growth and land use
Financing and value capture
Joint development
Integrating transportation and land development in the developing world
