

CALL FOR PAPERS

ICBER 2023
Sep 20-21, 2023
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBER 2023 : International Conference on Bioremediation Engineering and Research is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Bioremediation Engineering and Research. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Bioremediation
Bioremediation engineering
Development of bioremediation
Environmental bioremediation
technologies
Bioremediation of soil and water
sources
Application of bioremediation on
solid waste management
Bioremediation process
Energy biotransformation
Environmental variations in field
Bioremediation of pesticide in
surface soil treatment
Bioremediation of pesticides using
scale up process bioreactors

Bioremediation of benzene using a
designed and developed partitioning
bioreactor
Biodegradation of petroleum
hydrocarbon compounds
Bioremediation of heavy metals
Bioremediation of agricultural
waste
Phytoremediation
Bioleaching
Bio augmentation
Genetic engineering approaches
Mycoremediation
In-situ bioremediation
Ex-situ bioremediation
