

CALL FOR PAPERS

ICGCA 2023
Sep 23-24, 2023
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGCA 2023 : International Conference on Glass Chemistry and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Glass Chemistry and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Glass chemistry
Glass physics and chemistry
Recent advances in glass chemistry
Structure and properties of glass
Engineering applications and processing challenges
Novel applications and manufacturing techniques
Advanced glass processing
Glass materials technology
Novel processing technology
Advanced engineering glass and composites
Electrical and magnetic glass

Transparent glass and luminescent materials
Thin-films, membranes and coatings (nanostructured glass)
Glass for energy conversion and storage
Glass for environmental and energy applications
Glass for medicine, biotechnology and biomimetics
Ceramic and glass materials
Amorphous materials: common issues within science and technology
Ceramic matrix composites
Computational design of glass materials
Glass and optical materials
Traditional glass
