

CALL FOR PAPERS

ICCMS 2023
Sep 06-07, 2023
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMS 2023 : International Conference on Carbon Management and Sequestration is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Carbon Management and Sequestration. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Carbon management
Carbon pollution prevention and management
Carbon pollution emission
Carbon footprint
Carbon footprints and sustainable solutions
Carbon footprint of energy generation
Low carbon technologies
Sources of carbon emissions
Solutions and sustainable actions

Climate change and global warming
Rules, procedures and policies for carbon management
Carbon management policy planning and implementation
Carbon footprint analysis and management
Technological and engineering measures for carbon sequestration
Carbon mitigation analysis
Carbon emission management technologies
Information and communication technologies for carbon management
