

CALL FOR PAPERS

ICMMA 2023
Sep 06-07, 2023
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMMA 2023 : International Conference on Marine Microalgae and their Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Marine Microalgae and their Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Marine microalgae
- Marine microalgae biotechnology
- Microalgae diversity and cell structure
- Microalgae as a potential source for fuels and chemicals
- Storage mechanism and genetic modification potential of microalgae
- Techno-economic impact and commercialization potential
- Microalgae species
- Microalgae isolation and basic culturing techniques
- Mass production of microalgae
- Microalgae screening and isolation techniques
- Biofuel production from microalgae
- Bioethanol production from microalgae
- Medicinal effects of microalgae-derived fatty acids
- Microalgal nutraceuticals
- Production of biopharmaceuticals in microalgae
- Applications of microalgae-derived active ingredients
- Supercritical fluid extraction of microalgae biomass
- Genetic engineering of marine microalgae
- Microalgae-based wastewater treatment
- Microalgae-derived toxic compounds
