

# CALL FOR PAPERS

**ICMEET 2023**  
**Sep 16-17, 2023**  
**Zurich, Switzerland**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMEET 2023 : International Conference on Materials Electrochemistry and Electron Transfer is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Materials Electrochemistry and Electron Transfer. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electrochemistry for materials science

Electrochemistry for materials technology

Electrochemical processing of materials

Electrolytes

Liquid electrolyte solutions

Structure and bonding

Electrode potentials

Ad-atoms and underpotential deposition

Mass transport

Charge transfer

Electron transfer

Electrochemical reaction orders

Ion transfer

Charge transfer and mass transport

Nucleation and growth of metals

Surface dynamics

Deposition of alloys

Oxides and semiconductors

Photoelectrochemistry of semiconductors

Spectroscopic methods

Corrosion and corrosion protection

Intrinsically conducting polymers

Electrochemical synthesis and surface film formation

Nanoelectrochemistry
