

# CALL FOR PAPERS

**ICEPD 2023**  
**Oct 28-29, 2023**  
**Lisbon, Portugal**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEPD 2023 : International Conference on Electron Physics and Devices is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electron Physics and Devices. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electron physics  
Imaging and electron physics  
Theories and methods in electron physics  
Experiments in electron physics  
Scanning techniques in electron microscopy  
High-speed electronics and optoelectronics

Digital techniques in electron off-axis holography  
Optical symbolic substitution architectures  
Semiconductor quantum devices  
Fuzzy relations and applications  
Basis algorithms in mathematical morphology  
Mirror-bank energy analyzers
