

CALL FOR PAPERS

ICEG 2023
Oct 25-26, 2023
Bali, Indonesia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEG 2023 : International Conference on Electromagnetic Geothermometry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electromagnetic Geothermometry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electromagnetic geothermometry
Electromagnetic sounding of
geothermal areas
Conceptual models of geothermal
areas
Neural network approach to the
temperature estimation
Indirect electromagnetic
geothermometer
Estimating deep heat transfer
mechanisms

Geothermometer calibration
Temperature extrapolation
Electrical resistivity of rocks
Geological and geophysical data
Temperature models
Electromagnetic sounding data and
rock physics
