

CALL FOR PAPERS

ICAPSP 2023
Oct 28-29, 2023
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAPSP 2023 : International Conference on Advanced Power System Protection is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Power System Protection. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Power-system protection
Protection system in power system
Protective devices, systems, and technologies
Intelligent techniques applied to protection systems
Adaptive relaying
Communication systems dedicated to protection systems

Advanced signal processing techniques applied to protection systems
Multi-agent based protection systems
Wide-area protection systems based on broadband communications and time synchronous systems
Application of phasor measurement units to protection systems
Development of unified protocols dedicated to protection systems
Fault location techniques
