

CALL FOR PAPERS

ICEPD 2023
Oct 28-29, 2023
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEPD 2023 : International Conference on Electron Physics and Devices is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electron Physics and Devices. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electron physics
Imaging and electron physics
Theories and methods in electron physics
Experiments in electron physics
Scanning techniques in electron microscopy
High-speed electronics and optoelectronics

Digital techniques in electron off-axis holography
Optical symbolic substitution architectures
Semiconductor quantum devices
Fuzzy relations and applications
Basis algorithms in mathematical morphology
Mirror-bank energy analyzers
