

CALL FOR PAPERS

ICEERE 2023
Oct 07-08, 2023
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEERE 2023 : International Conference on Electrical Engineering and Renewable Energy is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electrical Engineering and Renewable Energy. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electrical engineering and
renewable energy systems
Transforming renewable energy to
electricity
Renewable source-powered
generations
Analysis and design of control
systems
Power electronics and drives
Energy management and conservation
Energy in buildings
Grid-connected microgeneration
systems

Electric power generation by
renewable sources
Control systems design
Next generation silicon
technologies
Micro- and nano-electromechanical
systems
Power electronics and drives
Electric drives
Programming for renewable energy
systems
